Effect of chemical manures on Demonstration Farms.

191 MR. K. NARAYANAPERUMAL NADAR (*Agastisvaram*): Will the Government be pleased to state:

(*a*) whether chemical manures are being used in the several Demonstration Farms in the State:

(*b*) if so, with what results;

(*c*) whether they have been found injurious or useful;

(*d*) whether yearly reports about the success achieved or failures observed in the several Government Farms using those manures are being received and published; and

(*e*) if not, whether they will publish them for the information of the public?

MR. A. KUMARA PILLAI (*Ag. Secretary to Government*): (*a*) Chemical manures are being used in the Government Farms.

(*b*) and (*c*) The application of chemical manures without the addition of organic manures injuriously affects the productive capacity of all types of soils, particularly those lacking in organic matter, but their application in combination with a small quantity of organic manures has yielded better results than either applied separately.

(*d*) Details of the experiments conducted with these manures in Government Farms are being published in the annual reports of the department.

(*e*) This question does not arise, in view of the answer to part (*d*) above.
